The NAB SHOULD put more efforts into improving what they provide. Sat radio is a choice made by individuals, that's why we pay for it. Because we are tired of the same old shotty programming that broadcast provides. I am glad to see XM provide Traffic and Weather. I only wish that they could cover more cities.

Bottom line, we subscribers pay for what we get. And we love it. So what if the NAB don't like it. It would be wrong to regulate where regulation is not warranted.
